Kiryat Moshe Community Centre Sports Garden

\ Who you will help

The community of Kiryat Moshe is made up largely of immigrants from Ethiopia that are being integrated into Israeli society.

The community centre serves as a central part of the community, giving kids and their families a place to engage in fun, active, and educational activities where they can grow as individuals. The community centre also helps the youth of Kiryat Moshe build a strong sense of community through communal activities and organized sports.

\ Your donation will fund

The existing infrastructure of the community centre is outdated and needs upgrading to continue serving the growing needs of the community. To do this the community centre aims to build a sports-garden area which will combine the development of a vegetable garden with seating areas and a playground with a basketball and soccer facility.

The new infrastructure will include the following:

- A welcoming outdoor space to take children to play in the afternoon
- A community garden where community members of all ages can learn about gardening and cultivation of a garden
- Sports facility with exercise equipment
- Basketball and soccer facilities
- Synthetic grass and a rubber surface

\ The Location

Kiryat Moshe is a neighbourhood located in Rehovot.
