\ Who you will help

The children who arrive at Jerusalem Hills Therapeutic Centre (JHTC) come from all sectors of Israeli society but they have one thing in common: each of them is a victim of emotional, sexual or physical abuse; neglect; rejection, or abandonment. Every child has his or her own individual story, many of which are heartbreaking. They have learned from an early age to hide their emotions behind a barrier of anger and distrust, often with aggressive and destructive behavior. For many, Jerusalem Hills represents a last chance for the pathway back into normative society.

JHTC, through unique therapy programs and outreach projects, has achieved unprecedented success in rehabilitating and mainstreaming the majority of more than two thousand graduates back into independent and meaningful life in society.

\ Location

In the Jerusalem Hills, a low mountain range surrounding Jerusalem.
